

National FAA Safety Team presents:

AirVenture 2023 Forum - Flying Blind

You may have 20/20 vision ... but what do you really see? We will examine the human brain (hardware) and mind (software) as they relate to our visual system. Too often we "look" but do not "see". This may be a function of our "hardware" and/or our "software". But in all cases, this blindness must be understood so that we may incorporate techniques to improve our visual performance.

WINGS/AMT credit available!

To receive WINGS/AMT credit fill out attendance sheet available at the Forum entrance.

Directions: The FAA Safety Center is centrally located on the EAA AirVenture grounds on the South side of the control tower. We are the large tan building with the rooftop deck facing the runway. Forums entrance is on the west side of the building.

Prior to attending a safety seminar, please review and abide by current CDC, State and local health guidelines.

A message from the National FAASafety Team Manager

Earn your WINGS to get a chance to win a prize. Go to
